the first resinous layer being bonded to the convex surface of the injection molded, polymeric optical element.

- 37. The optical element of claim 36 comprising a lens for eye-wear.
- 38. The optical element of claim 36 wherein the functional layer comprises a polarizing layer.
- 39. The optical element of claim 36 wherein the functional layer comprises a photochromic layer.
- 40. The optical element of claim 36 wherein the first resinous layer and the second resinous layer comprise polycarbonate resin.
- 41. The optical element of claim 37 wherein the functional layer comprises a polarizing layer.
- 42. The optical element of claim 37 wherein the functional layer comprises a photochromic layer.
- 43. The optical element of claim 37 wherein the first resinous layer and the second resinous layer comprise polycarbonate resin.
- 44. The optical element of claim 37 wherein the optical element is an optical lens.
- 45. The optical element of claim 38 wherein the optical element is an optical lens.
- 46. The optical element of claim 39 wherein the optical element is an optical lens.
- 47. The optical element of claim 40 wherein the optical element is an optical lens.
